

# Stop Motion Pro™

## Installing and using Stop Motion Pro on Microsoft Vista January 6, 2009

The Microsoft Vista operating system has a number of security options resulting in Stop Motion Pro V5.1 requiring some manual installation assistance.

The following 3 steps need to be performed for each Vista user to enable Stop Motion Pro V5.1 to operate correctly.

Each user of Stop Motion Pro V5.1 needs Vista Administrator privileges. See your Vista documentation for more information on how to set this.

### **Step 1:**

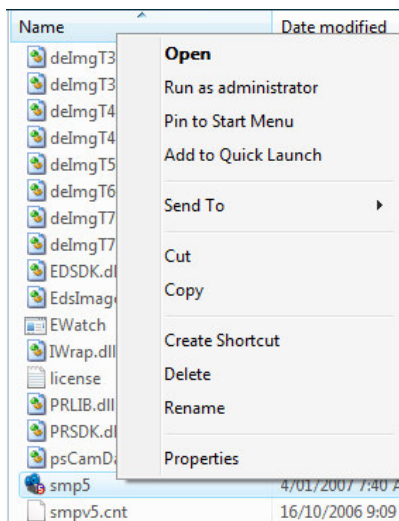

Install Stop Motion Pro V5.1 from the supplied setup file downloaded from [http://www.stopmotionpro.com/index.php?option=com\\_wrapper&Itemid=89](http://www.stopmotionpro.com/index.php?option=com_wrapper&Itemid=89)

### **Step 2:**

Start **Windows Explorer**. (You can do this by pressing the Microsoft Windows icon keyboard key, hold it down then press the letter “e” key).

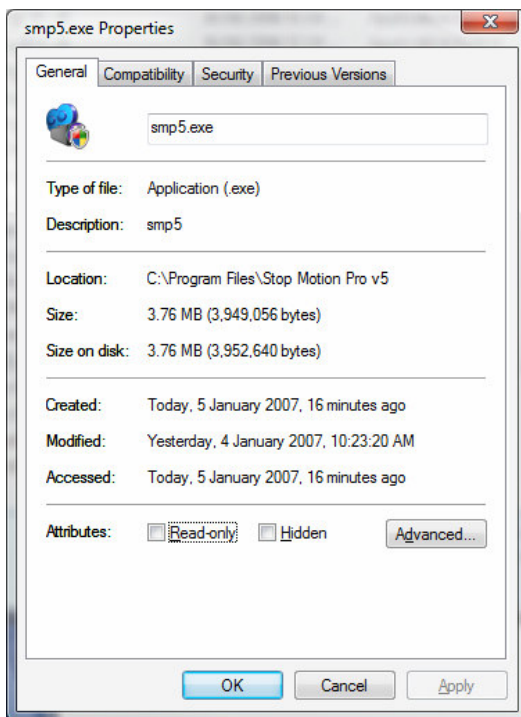

Navigate to the **c:\Program Files\Stop Motion Pro V5** directory.

Right click on **smpv5.exe** and the following popup menu will be displayed.

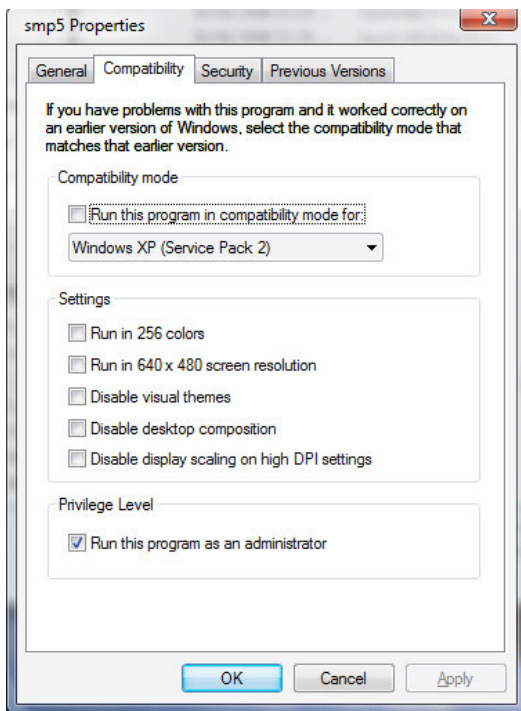

# Stop Motion Pro™

Select **Properties** and the following dialog box will be displayed.

Select the **Compatibility** tab and the following will be displayed.

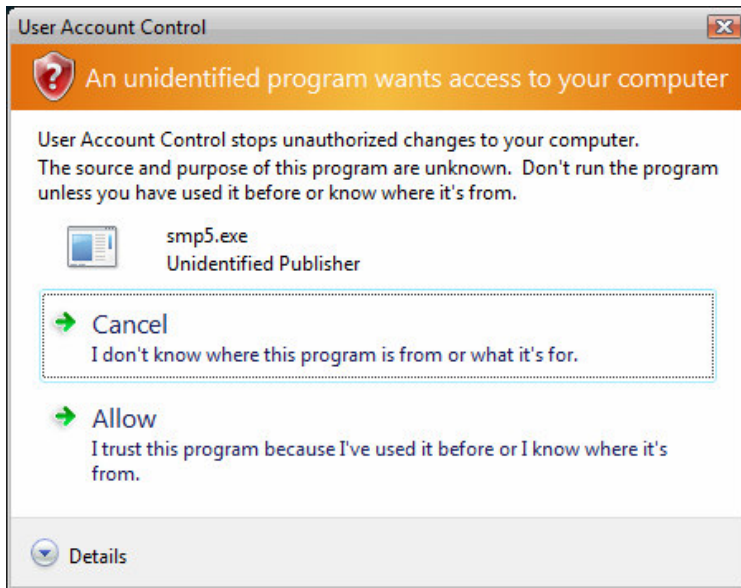

The **Run this program as an administrator** must be **checked** as shown above.

# Stop Motion Pro™

Click **OK**.

### **Step 3:**

Run Stop Motion Pro V5.1 from the Windows **Start** menu. The following dialog box will be displayed.

Click **Allow** and Stop Motion Pro V5.1 will run.
